

ALL TECH
ELECTRONICS

All Tech Electronics is the largest stocking certified SDB in the country. Our fully certified, HI REL, MIL SPEC AND SPACE LEVEL inventory is one of the most comprehensive in the defense and aerospace industry. All of our products are managed within an ISO 9001:2008 and AS9120 certified quality management plan. In a comparative analysis, All Tech clearly distinguishes itself not only from other SDB's but from many of the largest electronics distributors in the country.

All Tech Electronics offers products from a variety of diode, transistor and IC manufacturers. Our program is aimed at reducing customer costs by offering as wide an array of products and suppliers to our customers as possible. Utilizing our entire line card, our salespeople will work diligently on your behalf to help you avoid costly "sole source" supplier challenges. In addition to our MIL SPEC product offering we supply equivalent, screened and custom products. All Tech offers drawing/SCD evaluation, at no cost, in order to determine if expensive "sole source" drawings can be procured at a lower cost with the addition of a second approved manufacturer to your drawing. The results of these efforts are yielding significant savings to customers that are currently working with us in this venue.

All Tech Electronics addresses the challenges of today's DMS problem. Anyone familiar with DMS knows that changes in technology, limited availability of die or raw materials, and the relatively small size of the military and aerospace market combine to impact systems and applications.

- All Tech can provide obsolescence support via an active parts management program.
- All Tech can monitor Bill of Materials for component obsolescence issues.
- Receive and distribute alerts on multiple BOM's as they occur.
- Assess alternate qualified sources, die, package and component rescreening viability.
- Provide redesign alternatives with existing and alternate die manufacturers to repackage form, fit and functional replacement solutions.

"A franchised stocking distributor and DMS Obsolescence solutions provider, specializing in military grade and high reliability semiconductor products."

"COMMITTED TO EXCELLENCE"
All Tech provides our customers with an SBA Certified SDB business partner that doesn't require them to compromise quality or price.."

THE ALL TECH ADVANTAGE:

Mil-Specs Available:

Diodes & Transistors - M19500 - JAN, JANTX, JANTXV, JAN 'S' SX,, MX

IC's - M38510, 883, DESC/SMD, 5962, Rad Tolerant, Space

Capacitors -M55681 **Connectors** -M55302

**Certified by the United States Small Business Administration
Quality System and Distribution Center Compliance:**

ISO 9001:2008 and AS9120

Full Documentation and Traceability

Value Added Services

Full Service Obsolescence Management, Custom Packaging, Parts Management, Design Services Screening,
Electrical and Environmental Testing, DPA, Tape and Reel,
Mil Packaging

Diodes and Transistors

API - power transistors

HI REL COMPONENTS
(AEROFLEX/METELICS) - diodes, transistors

SEMICOA - small signal, RF and power transistors,
mil spec, space and custom

SEMICONDUCTOR TECHNOLOGY - diodes, transistors

SEMTECH - diodes, tvs, power discretes, rectifier
assemblies, hi volt capacitor

SENSITRON - rectifiers and transistors

SOLITRON - transistors

Integrated Circuits

MICROSS / AUSTIN SEMICONDUCTOR - sram, dram, vram, eprom, eeprom,
sdram, flash, TI military memory

CHIP SUPPLY - custom packaging

MICROPAC INDUSTRIES - hybrids, multi-chip modules, optocou-
plers, LEDs

MINCO TECHNOLOGY - linear, ecl, memory, custom pack-
aging

TEXAS INSTRUMENTS - analog and mixed signal, logic

PYRAMID SEMICONDUCTOR - sram, eprom, eeprom

Transformers

VANGUARD ELECTRONICS - power magnetics, RF Inductors /
transformers

Capacitors

PRESIDIO COMPONENTS - ceramics, stacked, microwave/rf

Connectors

INCON CONNECTOR - pc board, rack and panel

The SMART DMSMS Solution
Life Cycle Data Centric Software Solution for
Supportability and Obsolescence Management

One Click Away from Decision Support Solutions

SMART takes Obsolescence Management to a new level by incorporating all of the key ingredients required for program supportability. Complete life cycle management and software processes have been encompassed within SMART to meet your specific program requirements with solution workflow and best practices options. Unique data modeling and reporting sets SMART apart. With the Intelligent Content Engine (ICE), industry data is embedded and automatically updated. Smart's data centric design empowers information and data outputs and easily integrates with existing tools and data sources. With SMART, you have visibility and priority control for all internal data sources Call your All Tech representative for more info.

News:

SEMICOA Aligns with ALL TECH for Distribution

Mon Oct 19, 2009 2:51pm EDT
COSTA MESA, Calif.--(Business Wire)-- Semicoa Corporation has entered into an agreement with All Tech Electronics to distribute Semicoa products and parts nationally. All Tech has over 50 years experience in the military, high rel and space component and application business. Their experience in distributing and stocking Semicoa's product line of bipolar diodes, transistors, and upcoming MOSFETs and IGBTs for the defense and aerospace industry will provide full service solutions and the expertise to solve and manage client challenges. Semicoa VP of Channel Sales, Kathleen Whitcher stated, "We are very pleased to have an organization like All Tech on board to handle the increased demand in sales. I have worked with them in the past and they are one of the best in the industry. We look forward to a strong and productive relationship with them to satisfy our client needs."

All Tech Electronics announces the addition of Vanguard Electronics to their line card of products.

January 2011
All Tech Electronics, Inc. has signed a franchised distribution agreement with Vanguard Electronics, an acknowledged leader in space level magnetics, power transformer and power inductor manufacturer. The agreement will enable All Tech to bring Vanguard Electronics, ISO9001:2008 /AS9100/DSCC certified line of products to the space, military and aerospace markets.

August 1st 2009 - Minco Technology Labs to market its line of CMOS4000, 54HC & 54HCT Logic family

Minco Technology Labs, Inc to market its line of CMOS4000, 54HC & 54HCT Logic family. This will allow Minco to meet DSCC's certified requirements in providing it's military and aerospace customers a continuous SMD product support for these products.
